Service(s) this person is looking for (please check all that apply):

100 Responses

Were they connected to any of these services today?:

54 Responses

Mobile Response Project

Which service(s) did we connect them to? (Please include details of where, intake date (if applicable), and whether there is follow up needed)

Data
BHRC and because it's late for detox, while at BHRC John is going to have someone talk with her but she will need to go back tomorrow to navigate getting a detox bed.
Transcending Hope Emergency E bed
The peer was connected to detox and willing to go directly. It was too late to get him in but he did his screening with Recovery Works NW. They scheduled him for intake at 9am on the 28th. We were able to bring Justine back to BHRC and allow him to get a shower. Just was connected with 2 peers from our Nav team at BHRC who where able to secure a shelter bed at the Portland Rescue Mission. Our peer made arrangements to pick Justine up in the morning at the shelter and take him to detox at 9am. Justine took his shower at BHRC and checked into the shelter at 7:30
Another chance IOP
This person was connected to the Do Good shelter located at the BHRC. He completed an intake today and is successfully in a shelter bed.
Shelter, treatment, mental health
We did MHAAO BHRN referral. We also set him up with a appointment to come into The Miracles Club to meet with a peer for a intake and services
BHRC Day shelter to shower, eat food, utilize clothing closet and other services
Recovery Works NW for Detox and Treatment. He is admitting today.
Detox, shelter and substance treatment
Hooper Detox referral sent and I will follow up tomorrow with date & time. I also gave Conner my contact info and we plan to stay in contact until he's good.
Contacted Recovery NW and set an appointment for tomorrow to get into detox. Also got contact information to Peers from Miracles Club to receive services.
Other entries

If we were not able to connect the person, why not?

Data

Individual did not want to go to detox due to missing and leaving his job but said he would call back in 5 days. Individual received a MHA AO Peer Support Referral for services and was willing to work with a peer in the near future to take those steps to detox

She wanted a shelter that her animals could go to and additional peer support.

It was too late at night to get connected to services but discussed all the options. We discussed his being at Lualwood Shelter but was exited for staying out two nights. Does have some outreach at CCC who can help him get back into shelter. Is showing interest in detox and medical attention for various inquires and sever pain in feet, arm and shoulder. Discussed getting into Recovery Works NW Detox tomorrow when intake hours start again. He has some access to Tiny home placement though outreach. MHA AO Nav Team peers may be able to help with that. There is a Bridges to Change Latino stabilization house could be notified for intake. Peer at BHRC can call BHRN navigators for additional information 971-712-3236

We would have been able to connect to detox directly but they said it was too late

Too late in the day but he is going to the BHRC tomorrow (van first) and is to ask for detox bed with Recovery Works NW. If someone will contact me "Ryan" I will come and meet with him as he is a veteran and has access to other services through VA that I can assist with.

Services weren't available right away

Peer felt ambushed by PPB and did not understand why he was given a citation because they didn't find anything?

Peer was not ready yet but we exchanged contact info and processed emotions.

Individual got to speak with recovery works nw wasnt able to get in because recovery works nw is not equiped with alcohol detox

Individual took resource list and said he would call on his own time. Individual spoke with me about service options and said he would call he took my number and name

It was too late to connect in the moment with these services for detox and residential treatment. The peer was given information to present to BHRC on 12/14/23 to follow up with the expressed goal for detox, residential and MAT services. The peer relayed past experience of doing Methadone but felt it had not been sufficient treatment at the time with dose to low. We discussed going to Recovery Works NW for detox and MAT done in same location. The peer asked about residential treatment. We discussed FORA which could do detox and treatment. Explained the times for either of these options and the opportunity for peer to help make these connections during work hours. The peer was supplied with contact information for me for follow up and/or follow up at BHRC which the peer was familiar with. The peer had a citation and was encouraged to keep it for assistance with getting it settled

Peer didn't want to go at the moment, but was provided location of BHRC as well as a brief description of potential services provided.

Mobile Response Project

Was this person connected to services already (prior to this interaction)?

54 Responses

What services were they already connected to?

15 Responses

Do you have a brief impact story you'd like to share about this encounter?

Data
P asked for help asking for services and wanted housing the individual came up to MHAAO Latinx BHRN Ricardo, Elvio & NWIL staff Israel and we were able to connect her to transcending hope cultural specific emergency week bed & possibly 6 months housing if individual manages to stay clean. P was really shocked and grateful to achieve housing she was so happy because it's cold.
Met a couple, they were interested in going to detox, Heidi worked with them at bhrc to get into detox, coordination was done to and went to detox
Was doing outreach and I approached this peer to build rapport. I shared my lived experience as a person of color with substance use. I was able to convince him about detox and he said yes and connected him with recovery works nw. He will be admitted today 1/11/24
B shared that she came to Portland 2 years ago after divorce and was introduced to fentanyl. She is very willing to go to detox and get clean. She did receive a citation from PPB.
C is very willing and had 10 years off heroin until a relapse in 2019. He is a Navy Veteran with honorable discharge. He says he's ready and wants help.
Eder and I were able to listen and connect with L, she was just going through it and needed support. She promised she will reach out for additional support...and we texted her our numbers and names and addresses of our organizations.
I spoke with D on the streets he was from California and did not want treatment or detox he wanted housing and shelter I mentioned the BHRC to him so he could get a warm meal and coffee
The police call us we engage the person and referred to a shelter
Individual is trying to get out of the cold with her spouse, they were placed on wait list for tiny home for couples. Rapid response had just asked them to move, so they are currently on oak and 9th
This individual says he's been around and has not received services does not want shelter but would be open to tiny home it's just going to be hard because no contact info for this individual I did tell him about the bhrc and how to gain access and got a commitment to follow up
Being able to connect with this person on the street and provide immediate peer services gave this person an option that they have never had in the moment. They were excited to not have to sleep on the street tonight.
